Triangle Lake Team:

I wanted to thank each and every one of you involved in making the Triangle Lake environmental sampling event a success. From everything I have heard and observed, the sampling was successfully completed, the residents were supportive of our efforts and no one was [seriously] injured (Raymond - I hope the itching has stopped!)

The field team, Jed, Raymond, Erin, Chad, Alan, Rich and Doc did a great job. 100% completion!

Jed, a big thank you to you for all your planning and organization of the sampling equipment and supplies.

Elizabeth, thank you for your unique approach to sample location selection.

Kay, Erin, and Juliann, thank you for contacting residents and scheduling visits for the three teams to 38 homes.

Donald and Jed, thank you for developing the QAPP so everyone was clear on the project procedures and objectives.

Raymond, thank you for preparing the HASP, and especially for including insect bites as a potential hazard.

Rich, thank you for teaming up with us for the field work and thanks to DEQ for all your support (moral and technical) on this team effort.

I am sorry if I missed anyone. All your hard work is greatly appreciated. Data should start to come in in about 45 to 60 days. Don't forget - there will an opportunity for air sampling in the spring. It sounds like the residents near Triangle Lake can't wait to have you back!

Sheila
